**The Education Invasion** Joy Pullmann,2017-03-14 Most Americans had no idea what Common Core was in 2013, according to polls. But it had been creeping into schools nationwide over the previous three years, and children were feeling its effects. They cried over math homework so mystifying their parents could not help them, even in elementary school. They read motley assortments of “informational text” instead of classic literature. They dreaded the high-stakes tests, in unfamiliar formats, that were increasingly controlling their classrooms. How did this latest and most sweeping “reform” of American education come in mostly under the radar? Joy Pullmann started tugging on a thread of reports from worried parents and frustrated teachers, and it led to a big tangle of history and politics, intrigue and arrogance. She unwound it to discover how a cabal of private foundation honchos and unelected public officials cooked up a set of rules for what American children must learn in core K-12 classes, and how the Obama administration pressured states to adopt them. Thus a federalized education scheme took root, despite legal prohibitions against federal involvement in curriculum. Common Core and its testing regime were touted as “an absolute game-changer in public education,” yet the evidence so far suggests that kids are actually learning less under it. Why, then, was such a costly and disruptive agenda imposed on the nation’s schools? Who benefits? And how can citizens regain local self-governance in education, so their children’s minds will be fed a more nourishing intellectual diet and be protected from the experiments of emboldened bureaucrats? The Education Invasion offers answers and remedies.

*Planning and Design for Sustainable Urban Mobility* Un-Habitat,2013-10-30 Urban transport systems worldwide are faced by a multitude of challenges. Among the most visible of these are the traffic gridlocks experienced on city roads and highways all over the world. The prescribed solution to transport problems in most cities has thus been to build more infrastructures for cars, with a limited number of cities improving public transport systems in a sustainable manner. However, a number of challenges faced by urban transport systems – such as greenhouse gas emissions, noise and air pollution and road traffic accidents – do not necessarily get solved by the construction of new infrastructure. Planning and Design for Sustainable Urban Mobility argues that the development of sustainable urban transport systems requires a conceptual leap. The purpose of ‘transportation’ and ‘mobility’ is to gain access to destinations, activities, services and goods. Thus, access is the ultimate objective of transportation. As a result, urban planning and design should focus on how to bring

people and places together, by creating cities that focus on accessibility, rather than simply increasing the length of urban transport infrastructure or increasing the movement of people or goods. Urban form and the functionality of the city are therefore a major focus of this report, which highlights the importance of integrated land-use and transport planning. This new report of the United Nations Human Settlements Programme (UN-Habitat), the world's leading authority on urban issues, provides some thought-provoking insights and policy recommendations on how to plan and design sustainable urban mobility systems. The Global Report on Human Settlements is the most authoritative and up-to-date global assessment of human settlements conditions and trends. Preceding issues of the report have addressed such topics as Cities in a Globalizing World, The Challenge of Slums, Financing Urban Shelter, Enhancing Urban Safety and Security, Planning Sustainable Cities and Cities and Climate Change.

**Food and Cooking Skills Education** Anita Tull, 2018-01-29 Food and Cooking Skills Education (FCSE) is a complex mix of policy and practicality, educational theory and pedagogy, classroom and government policy. This book shows how FCSE has been at the centre of a tussle between education and policy for decades. It reviews how FCSE has grappled with various significant issues of concern that threaten to marginalise it and pose problems for educational practicalities, as expectations are increased, but resources are squeezed. It assesses the debate about the significance and importance of acquiring practical food and cooking skills in a society where the purchase of ready-made food has become commonplace, and public knowledge of where our food comes from is noticeably lacking. This has contributed to the escalating incidence of diet-related diseases and the attendant cost to society, and threatened environmental sustainability. In turn, governments have reacted by proposals to make practical cooking skills a statutory National Curriculum subject as part of the armoury for tackling such costs. Based on detailed research conducted across England and Wales, as well as comparisons with thirty-five other countries or states, the author makes recommendations for policy to manage this challenge facing contemporary society.

**What Lies Ahead for America's Children and Their Schools** Richard Sousa, 2014-03-01 The coming decade holds immense potential for dramatic improvement in U.S. education and in the achievement of American children and in this volume, members of the Hoover Institution's Koret Task Force on K-12 Education examine both the potential gains and the pitfalls that lie ahead, informed by where U.S. education has been, what changes have been made in recent years, and what's still required for the comprehensive overhaul that this vital enterprise so urgently needs. Looking backward is infinitely easier than predicting the future, but planning for the future is necessary if anything is to change and by analyzing the recent past and present condition of American primary and secondary school education across a host of key topics, task force members in this volume chart a bold course for the years ahead. Optimistic about the opportunities at hand, they identify essential—and feasible—reforms as well as the barriers that must be overcome if those changes are to occur. They offer high-

quality scholarship and thoughtful prescriptions for productive policy alternatives.

**Global Literacy in Local Learning Contexts** Mary Faith Mount-Cors, 2016-06-10 Based on qualitative research focused on literacy and health from three schools in coastal Kenya, this book examines country, school, and family contexts to develop a dual-generation maternal-child model for literacy learning and to connect local-specific phenomena with national and international policy arenas. In contrast to international development organizations' educational policies and programs that tend to ignore literacy as a social practice within diverse contexts, the author unpacks the relationship between education and health, and the role of family and mothers in particular, highlighting how mothers are key actors in children's literacy development and health outcomes.

**Journey to Jo'Burg (HarperCollins Children's Modern Classics)** Beverley Naidoo, 2011-05-26 This is the story of love, commitment and the flowering of the human spirit against the background of South Africa's apartheid.

**Fighting the Forever War** Lisa M. Munday, 2022-02-07 During two decades of fighting in Afghanistan, U.S. service members confronted numerous challenges in their mission to secure the country from the threat of al-Qaeda and the Taliban and assist in rebuilding efforts. Because the wars in Iraq and Afghanistan occurred simultaneously, much of the American public conflated them or failed to notice the Afghanistan War; and most of the war's archival material remains classified and closed to civilian researchers. Drawing on interviews and letters home, this book relates the Afghanistan War through the experiences of American troops, with firsthand accounts of both combat and humanitarian operations, the environment, living conditions and interactions with the locals.

**Getting Education Right** Frederick M. Hess, Michael Q. McShane, 2024 In *Getting Education Right*, Rick Hess and Mike McShane argue that America has too long suffered from the absence of a robust, coherent, and principled conservative vision for educational improvement. The book both diagnoses a problem and offers a solution. The problem? The right has too narrowly focused on school choice, campus speech, and shrinking Washington's footprint, while the left has sought to subsidize and supersize the status quo. The solution? An education system imbued with shared values, respectful of family ties, and equipped for the challenges of the 21st century. Rooted in fundamental conservative principles, the book explains both how we got here and where we need to go when it comes to early childhood, K-12, and higher education. Eschewing performative polemics, this book offers a field guide to bringing education back to its formative mission. Readers from across the ideological spectrum will benefit from engaging with the provocative analysis Hess and McShane offer, whether or not they agree with the policies they propose. Education is the foundation on which America's future will be constructed, and *Getting Education Right* provides a timely blueprint for that project. Book Features: A conservative vision for the direction of American education in early childhood, K-12, and higher education. A stimulating and informative presentation for audiences across the ideological spectrum. An explanation of what it means to be a conservative in education today applied to a series of

crucial questions about American schooling. A readable and accessible text with plenty of anecdotes, provocative data points, and real-world solutions. Authors who are especially well-suited to this task given their prominence as influential conservative scholars and pundits.

It is a one-stop reference guide to education and educational issues/concerns here. There are three sections: Part 1 provides a sectorial overview of how education has been organized in this country such as preschool, special needs, primary and secondary, and adult education divisions. In Part 2, contributors critically delve into issues and policies that are pertinent to understanding education here such as underachievement, leadership, language education, assessment, and meritocracy to question what Part 1 might have taken for granted. Part 3 contains the largest number of contributors because it offers a scholarly examination into specific subject histories. Policy-Making in the GCC Neil Quilliam, Mark C. Thompson, 2017-09-11 The GCC is a major player in the post-2011 reordering of the Middle East. Despite the rise in prominence of individual Gulf states - especially Kuwait, Qatar, Saudi Arabia and the United Arab Emirates - and the growth of the GCC as a collective entity, surprisingly little attention has been

paid to the actual mechanics of policy-making in the region. This book analyses the vital role that institutions are coming to play in shaping policy in the Gulf Arab states. The research coincides with two key developments that have given institutions new importance in the policy process: the emergence of a new generation of leaders in the Gulf, and the era of low oil prices. Both developments, along with dramatic demographic change, have compelled state and citizens to re-evaluate the nature of the social contract that binds them together. Contributors assess the changing relationship between state and citizen and evaluate the role that formal and informal institutions play in mediating such change and informing policy. The book shows how academic, social and economic institutions are responding to the increasingly complex process of decision-making, where citizens demand better services and further empowerment, and states are obliged to seek wider counsel, although wanting to retain ultimate authority. With contributions from both academics and practitioners, this book will be highly relevant for researchers and policymakers alike.

Hutt, 2021-03-09 In *Absent from School*, Gottfried and Hutt offer a comprehensive and timely resource for educators and policy makers seeking to understand the scope, impact, and causes of chronic student absenteeism. The editors present a series of studies by leading researchers from a variety of disciplines that address which students are missing school and why, what roles schools themselves play in contributing to or offsetting patterns of absenteeism, and ways to assess student attendance for purposes of school accountability. The contributors examine school-based initiatives that focus on a range of issues, including transportation, student health, discipline policies, and protections for immigrant students, as well as interventions intended to improve student attendance. Only in the past two or three years has chronic absenteeism become the focus of attention among policy makers, civil rights advocates, and educators. *Absent from School* provides the first critical, systematic look at research that can inform and guide those who are working to ensure that every child is in school and learning every day.

The Power of Bad John Tierney, Roy F. Baumeister, 2019-12-31 From the international bestselling authors of Willpower Why does a bad impression last longer than a good one? Why does losing money affect us more than gaining it? What makes phobias so hard to shake? The answer is the negativity bias - or in other words, the power of bad. As John Tierney and Roy F. Baumeister show, we are wired to react to bad over good. It makes sense in evolutionary terms, but in our modern world the lure of bad is, well, bad. It governs people's moods, drives marketing and dominates our news. It can explain everything from why wars start or couples divorce, to why we mess up job interviews or feud with neighbours. But there is good news. By using smart strategies from new science, we can train our brains to get better at spotting our own negativity bias, fighting back with our rational minds to manage the bad in our lives - and even using its power for positive results. Breaking bad's hold over us can help our own lives, at work and in our relationships. Properly understood, bad can be a good thing.

**Teaching to Change the World** Jeannie Oakes, Martin Lipton, Lauren Anderson, Jamy Stillman, 2015-11-17 This is an up-to-the-moment, engaging, multicultural introduction to education and teaching and the challenges and opportunities they present. Together, the four authors bring a rich blend of theory and practical application to this groundbreaking text. Jeannie Oakes is a leading education researcher and former director of the UCLA teacher education program. Martin Lipton is an education writer and consultant and has taught in public schools for 31 years. Lauren Anderson and Jamy Stillman are former public school teachers, now working as teacher educators. This unique, comprehensive foundational text considers the values and politics that pervade the U.S. education system, explains the roots of conventional thinking about schooling and teaching, asks critical questions about how issues of power and privilege have shaped and continue to shape educational opportunity, and presents powerful examples of real teachers working for equity and justice. Taking the position that a

hopeful, democratic future depends on ensuring that all students learn, the text pays particular attention to inequalities associated with race, social class, language, gender, and other social categories and explores teachers role in addressing them. The text provides a research-based and practical treatment of essential topics, and it situates those topics in relation to democratic values; issues of diversity; and cognitive, sociocultural, and constructivist perspectives on learning. The text shows how knowledge of education foundations and history can help teachers understand the organization of today s schools, the content of contemporary curriculum, and the methods of modern teaching. It likewise shows how teachers can use such knowledge when thinking about and responding to headline issues like charter schools, vouchers, standards, testing, and bilingual education, to name just a few. Central to this text is a belief that schools can and must be places of extraordinary educational quality and institutions in the service of social justice. Thus, the authors address head-on tensions between principles of democratic schooling and competition for always-scarce high-quality opportunities. Woven through the text are the voices of a diverse group of teachers, who share their analyses and personal anecdotes concerning what teaching to change the world means and involves. Click Here for Book Website Pedagogical Features: Digging Deeper sections referenced at the end of each chapter and featured online include supplementary readings and resources from scholars and practitioners who are addressing issues raised in the text. Instructor s Manual offers insights about how to teach course content in ways that are consistent with cognitive and sociocultural learning theories, culturally diverse pedagogy, and authentic assessment.
