Aimed at all teachers and trainees, it examines each element of the framework: the thinking environment, task design, training creative thinking, the building blocks of the writing process, and developing children's creative self-efficacy. This book provides such a comprehensive overview encompassing epidemiology, risk factors, current treatment and prophylaxis, disability, co-morbidity, and the impact on quality of life. World leaders in their respective fields provide state-of-the-art knowledge on the geriatric aspects of ophthalmology that will help to improve the management of this growing patient population.
