Cults and New Religious Movements: A Reader Lorne Dawson, 2003-06-09 What is a cult? Why do they emerge? Who joins them? And why do tragedies such as Waco and Jonestown occur? This reader brings together the voices of historians, sociologists, and psychologists of religion to address these key questions about new religious movements. Looks at theoretical explanations for cults, why people join and what happens when they do. Brings together the best work on cults by sociologists, historians, and psychologists of religion. A broad-ranging, balanced and clearly organized collection of readings. Includes coverage of topical issues, such as the 'brainwashing' controversy, and cults in cyberspace. Section introductions by the editor situate the nature, value, and relevance of the selected readings in context of current discussions.

Secularism in India Domenic Marbaniang, Historical account of the origin of Secularism and its development in India. This book was originally the MPhil thesis of the writer submitted to ACTS Academy in 2005.

Marxism and Religion, 2014-02-27 In Marxism and Religion leading Chinese scholars unfold before our eyes theoretical explorations of religion in present-day China. In addition, they along with senior cadres superintending religious affairs strenuously explain why the Marxist view of religion still has relevance to living religions in a country undergoing deep changes unleashed by the late paramount leader Deng Xiaoping's reform and opening-up policies. Mistakenly perceived by so many westerners as outdated and dogmatic quasi-scholarly work in the service of communist regime's propaganda, studies selected here are brainchildren of a group of creative and reform-minded scholars and cadres who endeavor to uphold Marxist traditions while innovatively sinicizing them, hoping that their efforts will contribute to the ruling party's ideological reconstruction. Contributors include: Fang Litian, Gao Shining, Gong Xuezheng, He Qimin, Jin Ze, Li Xiangping, Lü Daji, Wang Xiaochao, Wang Zuo'an, Ye Xiaowen, Zhu Xiaoming, and Zhuo Xinping.

The Theory Of Social And Economic Organization Max Weber, 2009-11-24 This book is an introduction to Max Weber's ambitious comparative study of the sociological and institutional foundations of the modern economic and social order. In this work originally published in German in 1920, Weber discusses the analytical methods of sociology and, at the same time, presents a devastating critique of prevailing sociological theory and of its universalist, determinist underpinnings. None of Weber's other writings offers the reader such a grasp of his theories; none displays so clearly his erudition, the scope of his

interests, and his analytical powers.

The New Age Movement Paul Heelas,1996-10-21 This is the first wide-ranging and accessible introduction to the fascinating subject of the New Age movement.

Sociology for AQA Volume 1 Ken Browne,2015-11-23 An AQA-approved resource. Sociology for AQA Volume 1 is the new edition of Ken Brownes invaluable and widely used textbook, designed for AQAs new Sociology AS level and Year 1 A level (for first teaching from September 2015). Religion and Change in Modern Britain Linda Woodhead,Rebecca Catto,2013-03-01 This book offers a fully up-to-date and comprehensive guide to religion in Britain since 1945. A team of leading scholars provide a fresh analysis and overview, with a particular focus on diversity and change. They examine: relations between religious and secular beliefs and institutions the evolving role and status of the churches the growth and 'settlement' of non-Christian religious communities the spread and diversification of alternative spiritualities religion in welfare, education, media, politics and law theoretical perspectives on religious change. The volume presents the latest research, including results from the largest-ever research initiative on religion in Britain, the AHRC/ESRC Religion and Society Programme. Survey chapters are combined with detailed case studies to give both breadth and depth of coverage. The text is accompanied by relevant photographs and a companion website.

Everyday Lived Islam in Europe Nathal M. Dessing,Nadia Jeldtoft,Linda Woodhead,2016-04-22 This book offers a new direction for the study of contemporary Islam by focusing on what being Muslim means in people's everyday lives. It complements existing studies by focusing not on mosque-going, activist Muslims, but on how people live out their faith in schools, workplaces and homes, and in dealing with problems of health, wellbeing and relationships. As well as offering fresh empirical studies of everyday lived Islam, the book offers a new approach which calls for the study of 'official' religion and

everyday 'tactical' religion in relation to one another. It discusses what this involves, the methods it requires, and how it relates to existing work in Islamic Studies.

Multiple Modernities Shmuel N. Eisenstadt, 2017-09-29 How may we characterize contemporary society in a world so complex? Can looking at the diverse paths followed by various cultures in the modern world generate useful new social scientific typologies, or must a different set of questions be posed in this era of globalization? What, in short, is the nature of modernity? These are some of the questions addressed by the contributors to *Multiple Modernities*. Following the theme in an earlier work edited by Shmuel Eisenstadt, *Public Spheres and Collective Identities*, this book challenges conventional notions of how the world has changed politically, socially, and economically. The authors consider the meaning of modernity in contexts as different as communist Russia, modern India, the Muslim world, Latin America, China and East Asia, and the United States. Miscegenation, transnational migration, technological developments, and changing communications have shifted the ground on which theories of society were once built; political system, diaspora groups, religion, and classical theories of modernity have to be reconsidered in a new context. Authors and chapters include: S.N. Eisenstadt, *Multiple Modernities*; Björn Wittrock, *Modernity: One, None, or Many? European Origins and Modernity as a Global Condition*; Johann P. Arnason, *Communism and Modernity*; Nilfer Gle, *Snapshots of Islamic Modernities*; Dale F. Eickelman, *Islam and the Languages of Modernity*; Sudipta Kaviraj, *Modernity and Politics in India*; Stanley J. Tambiah, *Transnational Movements, Diaspora, and Multiple Modernities*; Tu Weiming, *Implications of the Rise of 'Confucian' East Asia*; Jürgen Heideking, *The Pattern of American Modernity from the Revolution to the Civil War*; and Renato Ortiz, *From Incomplete Modernity to World Modernity*. Written in clear and non-technical language for both a scholarly and general audience, this volume confronts the problem of just what constitutes the common core of modernity.

Marx on Religion Karl Marx, 2002-03 A primer of the often overlooked yet significant writings of Marx on religion.

The Penguin and the Leviathan Yochai Benkler, 2011-08-09 What do Wikipedia, Zip Car's business model, Barack Obama's presidential campaign, and a small group of lobster fishermen have in common? They all show the power and promise of human cooperation in transforming our businesses, our government, and our society at large. Because today, when the costs of collaborating are lower than ever before, there are no limits to what we can achieve by working together. For centuries, we as a society have operated according to a very unflattering view of human nature: that, humans are

universally and inherently selfish creatures. As a result, our most deeply entrenched social structures – our top-down business models, our punitive legal systems, our market-based approaches to everything from education reform to environmental regulation – have been built on the premise that humans are driven only by self interest, programmed to respond only to the invisible hand of the free markets or the iron fist of a controlling government. In the last decade, however, this fallacy has finally begun to unravel, as hundreds of studies conducted across dozens of cultures have found that most people will act far more cooperatively than previously believed. Here, Harvard University Professor Yochai Benkler draws on cutting-edge findings from neuroscience, economics, sociology, evolutionary biology, political science, and a wealth of real world examples to debunk this long-held myth and reveal how we can harness the power of human cooperation to improve business processes, design smarter technology, reform our economic systems, maximize volunteer contributions to science, reduce crime, improve the efficacy of civic movements, and more. For example, he describes how:

- By building on countless voluntary contributions, open-source software communities have developed some of the most important infrastructure on which the World Wide Web runs
- Experiments with pay-as-you-wish pricing in the music industry reveal that fans will voluntarily pay far more for their favorite music than economic models would ever predict
- Many self-regulating communities, from the lobster fishermen of Maine to farmers in Spain, live within self-regulating system for sharing and allocating communal resources
- Despite recent setbacks, Toyota's collaborative shop-floor, supply chain, and management structure contributed to its meteoric rise above its American counterparts for over a quarter century.
- Police precincts across the nation have managed to reduce crime in tough neighborhoods through collaborative, trust-based, community partnerships.

A must-read for anyone who wants to understand the dynamics of cooperation in 21st century life, *The Penguin and the Leviathan* not only challenges so many of the ways in which we live and work, it forces us to rethink our entire view of human nature.

The Spiritual Revolution Paul Heelas,Linda Woodhead,2005-01-14 Comparing existing evidence from the USA and Europe, with a UK-based study of religion and spirituality, this fascinating book addresses the most pressing question in the study of religion today: are new forms of spirituality overtaking traditional forms of religion? Based on the detailed study of religion and spirituality in Kendal, UK Compares pioneering findings from Kendal with existing evidence from the USA and Europe Provides a theoretical perspective which explains both secularization and sacralization Offers some startling predictions about the future of religion and spirituality in the west Is written in an accessible and lively style, and will appeal to a broad range of readers interested in the future direction of belief in the western world.

Jesus in Disneyland David Lyon,2013-05-28 In this lively and accessible study, David Lyon explores the relationship between religion and postmodernity, through the central metaphor of 'Jesus in Disneyland.'

The New Christian Right Robert C. Liebman, Robert Wuthnow, This book of original essays provides an objective and enlightening analysis of the emergence and changing forms of the New Christian Right. The subject is in itself important in contemporary American life, but in addition The New Christian Right reexamines standard theories of social movements and the relationship between religion and politics in America today. The book presents findings from original research, including surveys, personal interviews with elites, analysis of financial documents, reanalysis of existing data, and analysis of direct-mail solicitations and other primary literature. The New Christian Right is balanced and objective rather than partisan and evaluative. Using non-technical and non-jargonistic language, the authors raise questions concerning the nature of religion, the role of status groups, and contemporary directions in American culture.

Stations of the Mind William Glasser, M.D., 2010-12-14 Stations of the Mind is a logical and necessary expansion of William Glasser's basic Reality Therapy ideas, an expansion which began with Positive Addiction about meditation, running, and other good addictions. In clear, nontechnical language, this book tells how our brains function in living—specifically what we do, think, and feel. Any reader can use it to make a major impact on the social sciences, medicine, and the growing field of meditation. Dr. Glasser's thesis, based on the Control System Psychology of William Powers, a student of cybernetics and consultant on this book, is that we, like all living creatures, are internally motivated. All of us are driven by powerful internal forces that push us not only to survive, but toward belonging, worthwhileness, fun, and freedom. From these and perhaps our other basic needs, we construct a complex, unique a personal world. Our brain then acts as the control system that deals with the real world to try and control it so that it comes as close as possible to our personal world. Glasser points out that what happens outside us in the real world is of little or no significance unless it relates to what is already inside us in our personal world. This new, human, internally motivated psychology contrasts sharply with the standard, external, mechanical, stimulus-response behavior psychology currently so popular. Glasser strips away much of the mystery that has surrounded the workings of our mind. Those who read the book carefully need never again be puzzled as to how we behave or about many of the whys of our behavior. It explains the common psychological upsets—from acting out to depression, from nonmedical pain and disability to psychoses. Dr. Glasser sets forth a new usable explanation of how addictive drugs work in the brain and why we use them. He also explains how our brain malfunctions and causes us to suffer psychosomatic illnesses. Finally, as we understand how our brain struggles to fulfill our needs, we will gain valuable insight into our most pressing social problem—how to get along with each other; that must come through negotiation and compromise. Our brain is not built to do otherwise. Here is a carefully developed thesis, a clear explanation of complex ideas, and a wide variety of ways that we can use them in our lives and our work.
