**Parenting Matters** National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Supporting the Parents of Young Children, 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

**Communicating Risks and Benefits** Baruch Fischhoff, 2012-03-08 Effective risk communication is essential to the well-

being of any organization and those people who depend on it. Ineffective communication can cost lives, money and reputations. *Communicating Risks and Benefits: An Evidence-Based User's Guide* provides the scientific foundations for effective communications. The book authoritatively summarizes the relevant research, draws out its implications for communication design, and provides practical ways to evaluate and improve communications for any decision involving risks and benefits. Topics include the communication of quantitative information and warnings, the roles of emotion and the news media, the effects of age and literacy, and tests of how well communications meet the organization's goals. The guide will help users in any organization, with any budget, to make the science of their communications as sound as the science that they are communicating.

**Creating Value Through Corporate Restructuring** Stuart C. Gilson, 2010-04-05 An updated look at how corporate restructuring really works Stuart Gilson is one of the leading corporate restructuring experts in the United States, teaching thousands of students and consulting with numerous companies. Now, in the second edition of this bestselling book, Gilson returns to present new insight into corporate restructuring. Through real-world case studies that involve some of the most prominent restructurings of the last ten years, and highlighting the increased role of hedge funds in distressed investing, you'll develop a better sense of the restructuring process and how it can truly create value. In addition to classic buyout and structuring case studies, this second edition includes coverage of Delphi, General Motors, the Finova Group and Warren Buffett, Kmart and Sears, Adelphia Communications, Seagate Technology, Dupont-Conoco, and even the Eurotunnel debt restructuring. Covers corporate bankruptcy reorganization, debt workouts, vulture investing, equity spin-offs, asset divestitures, and much more Addresses the effect of employee layoffs and corporate downsizing Examines how companies allocate value and when a corporation should pull the trigger From hedge funds to financial fraud to subprime busts, this second edition offers a rare look at some of the most innovative and controversial restructurings ever.

**Schlieren and Shadowgraph Techniques** G.S. Settles, 2012-12-06 Schlieren and shadowgraph techniques are basic and valuable tools in various scientific and engineering disciplines. They allow us to see the invisible: the optical inhomogeneities in transparent media like air, water, and glass that otherwise cause only ghostly distortions of our normal vision. These techniques are discussed briefly in many books and papers, but there is no up-to-date complete treatment of the subject before now. The book is intended as a practical guide for those who want to use these methods, as well as a resource for a broad range of disciplines where scientific visualization is important. The colorful 400-year history of these methods is covered in an extensive introductory chapter accessible to all readers.

**Connections in Steel Structures** R. Bjorhovde, J. Brozzetti, A. Colson, 1988-02-19 This book is the Proceedings of a State-of-the-Art Workshop on Connections and the Behaviour, Strength and Design of Steel Structures held at Laboratoire de Mecanique et Technologie, Ecole Normale, Cachan France from 25th to 27th May 1987. It contains the papers presented

at the above proceedings and is split into eight main sections covering: Local Analysis of Joints, Mathematical Models, Classification, Frame Analysis, Frame Stability and Simplified Methods, Design Requirements, Data Base Organisation, Research and Development Needs. With papers from 50 international contributors this text will provide essential reading for all those involved with steel structures.

**The Seleukid Royal Economy** G. G. Aperghis, 2004-12-23 The Seleukid empire, the principal successor-state of the empire of Alexander the Great, endured for over 200 years and stretched, at its peak, from the Mediterranean to the borders of India. This book provides a wide-ranging study of the empire's economy and the methods used by the Seleukid kings to monetise and manage it so as to extract tribute, rent and taxes as efficiently as possible. It uses a variety of Greek literary sources and inscriptions, cuneiform texts, archaeological, numismatic and comparative evidence to explore in detail the manner of exploitation of their lands and subjects by the Seleukid kings, their city-building activity, the financing of their armies and administration, the use they made of coinage and their methods of financial management. The book adopts a highly original, numerical approach throughout, which leads to a quantified model of the economy of an ancient state.

**Bosch Fuel Injection Systems** Forbes Aird, 2001 This complete manual includes basic operating principles of Bosch's intermittent fuel injection systems; D-L- and LH-Jetronic, and LH-Motonic tuning and troubleshooting intermittent systems; and high-performance applications.

**Cardiovascular Computing—Methodologies and Clinical Applications** Spyretta Golemati, Konstantina S. Nikita, 2019-02-12 This book provides a comprehensive guide to the state-of-the-art in cardiovascular computing and highlights novel directions and challenges in this constantly evolving multidisciplinary field. The topics covered span a wide range of methods and clinical applications of cardiovascular computing, including advanced technologies for the acquisition and analysis of signals and images, cardiovascular informatics, and mathematical and computational modeling.

**Autocar**, 2000

Alternative Propulsion for Automobiles Cornel Stan, 2016-08-05 The book presents - based on the most recent research and development results worldwide - the perspectives of new propulsion concepts such as electric cars with batteries and fuel cells, and furthermore plug in hybrids with conventional and alternative fuels. The propulsion concepts are evaluated based on specific power, torque characteristic, acceleration behaviour, specific fuel consumption and pollutant emissions. The alternative fuels are discussed in terms of availability, production, technical complexity of the storage on board, costs, safety and infrastructure. The book presents summarized data about vehicles with electric and hybrid propulsion. The propulsion of future cars will be marked by diversity - from compact electric city cars and range extender vehicles for suburban and rural areas up to hybrid or plug in SUV's, Pick up's and luxury class automobiles.

**Hazardous Chemicals Associated with Plastics in the Marine Environment** Hideshige Takada, Hrisi K.

Karapanagioti,2018-10-13 This volume consists of 15 chapters and focuses on hazardous chemicals, how they are associated with plastics, and their environmental risks. It includes background information on plastics and additives chemistry, and their observed or potential effects on living organisms as well as the oceanographic aspects of marine debris dispersion. The respective chapters provide insights into the sorption/desorption of chemicals in and out of plastics, the mechanisms and kinetics, but also the scale of the concentrations of chemicals found in marine debris, particularly in microplastics. The occurrence of the various chemicals is analyzed, as well as the distribution profiles of the chemicals in microplastics throughout the world's oceans. The implications of the fact that plastics carry within them several chemicals are discussed in detail. In closing, new research topics that warrant further attention are identified. The book will appeal to all scientists who are already working or interested in starting to work on the topic of marine debris, as well as policymakers, NGOs and the broader informed public.

**The Anthropology of Love and Anger** Joanna Overing,Alan Passes,2002-01-04 The Anthropology of Love and Anger questions the very foundations of western sociological thought. In their examination of indigenous peoples from across the South American continent, the contributors to this volume have come to realise that western thought does not possess the vocabulary to define even the fundamentals of indigenous thought and practice. The dualisms of public and private, political and domestic, individual and collective, even male and female, in which western anthropology was founded cannot legitimately be applied to peoples whose 'sociality' is based on an 'aesthetics of community'. For indigenous people success is measured by the extent to which conviviality, (all that is peaceful, harmonious and sociable) has been attained. Yet conviviality is not just reliant on love and good but instead on an even balance between all that is constructive, love, and all that is destructive, anger. With case studies from across the South American region, ranging from the (so-called) fierce Yanomami of Venezuela and Brazil to the Enxet of Paraguay, and with discussions on topics from the efficacy of laughter, the role of language, anger as a marker of love and even homesickness, *The Anthropology of Love and Anger* is a seminal, fascinating work which should be read by all students and academics in the post-colonial world.

*Historical Dictionary of the Philippines* Artemio R. Guillermo,2012 The Historical Dictionary of the Philippines, Third Edition contains a chronology, an introductory essay, an extensive bibliography, and several hundred cross-referenced dictionary entries.

**Fundamentals of Translation** Sonia Colina,2015-04-02 Clear and concise, this textbook provides a non-technical introduction to the basic theory of translation, with numerous examples and exercises.
